- Organizing at the State level – James Johnson, GFC
- 11:40-12 Lessons learned, future directions and discussion – Jim Miller, USDA FS

- 12:30-5 Field Tour and Networking
 - Lunch and Cogongrass Field Identification
 - Muddy Creek Restoration Site ... cogongrass to longleaf
 - Gena Todia, Wetland Resources
 - Loblolly pine establishment in cogongrass
 - Wilson Faircloth, USDA ARS; Jim Miller, USDA FS
 - Mike Patterson, AU

Approved for 8 Category 1 CFE hours;
Pesticide application recertification credits will be requested from States

Confronting the Invasion

Cogongrass is a growing threat as it continues its rapid spread across the Southeast, reducing forest and pasture productivity, destroying wildlife habitat, impacting rights of ways and presenting an extreme fire hazard.

The purpose of this conference is to convey the latest understanding in restoring lands, managing, controlling and eradicating cogongrass, and to explore existing and needed networks for coordinating strategies for successful cogongrass management.

Registration

Pre-registration: \$85 (by Oct 5)
Late registration: \$100

Includes: breaks, social, lunch, field trip and proceedings

Vendors: \$400
(See registration form for details.)
