

### **MIXTURES FOR COGONGRASS**

#### **Mixture for areas with no hardwood trees:**

Glyphosate – 2% V/V

Imazapyr (2 lbs a.i.) – 1% V/V

Non-Ionic Surfactant - .25% V/V

#### **Mixture for areas with hardwood trees:**

Glyphosate – 2% V/V

Non-Ionic Surfactant - .25% V/V

#### **Mixture for Seedhead suppression j:**

Imazapic – 12 ounces/acre

Non- Ionic Surfactant - .25% V/V

## **Cost-share, incentive and grant programs currently available to combat cogongrass**

**John W. Taylor, Jr., USDA Forest Service  
Forest Health Protection State and Private Forestry, Southern Region**

There are numerous sources potentially available for funding invasive plant control activities. While the majority of these opportunities are supported by federal agencies, there are some which are supported by corporations or non-profit organizations as well.

The United States Department of Agriculture sponsors a very aggressive grant and partnership effort encompassing approximately 20 named programs. Similarly, the United States Department of the Interior sponsors several grant programs through its agencies. For example, the United States Fish and Wildlife Service (<http://www.fws.gov/grants/>) has grants available to State Agencies, Local Governments, Conservation Organizations, Private Individuals, and Specialty Interests. There are several very useful websites that define these programs and which are designed to assist applicants in preparing their submissions. The website <http://www.grants.gov> is designed to be a unified source to electronically find, apply for, and manage Federal assistance opportunities. The Catalog of Federal Domestic Assistance (<http://www.cfda.gov>) is a comprehensive list of all domestic Federal grants which can be very useful when searching for potential funding sources.

The National Fish and Wildlife Foundation (NFWF) is a private, non-profit, 501(c)(3) tax-exempt organization established by Congress in 1984 which works to foster cooperative partnerships to conserve fish, wildlife and plant resources. NFWF uses challenge grants such as the Pulling Together Initiative (PTI) which encourage partnerships to stimulate private funding for conservation. Additional sources for funding may be viewed at the Environmental Grantmaking Foundation website ([www.environmentalgrants.com](http://www.environmentalgrants.com)) and on the Center for Invasive Plant Management website ([www.weedcenter.org](http://www.weedcenter.org)).
